PROFILE

Fresh Computer Science graduate with a strong foundation in full-stack development and software engineering. Passionate about building modern, scalable applications and continuously learning emerging technologies.

EXPERIENCE

Software Developer — Tamheer Trainee

04/2026 – Present

Marafiq — Power & Water Utility Company for Jubail and Yanbu

Jubail, SA

- Conducted QA testing for Marafiq CRM, validating business processes and ensuring application quality.
- Acquired hands-on knowledge of SAP systems and enterprise business workflows.
- Worked with Google Cloud Platform (GCP) and integration technologies to understand enterprise application connectivity.
- Developed a GIS-based interactive map covering all districts of Jubail Industrial City using Google Maps and GeoJSON.
- Built modern web applications using the Frappe Framework and Next.js.

Full-Stack Developer — Coop Trainee

01/2025 – 05/2025

Royal Commission for Jubail and Yanbu

Jubail, SA

- Authored multiple Business Requirement Documents (BRDs) and designed user interfaces tailored to business needs.
- Developed a web application using .NET technologies, ensuring functionality and user-friendly design.
- Gained hands-on experience with Azure DevOps, performing testing, task management, and deploying applications to the cloud.

EDUCATION

Bachelor of Computer Science

05/2025

Jubail Industrial College

Jubail, SA

CERTIFICATES

- Mobile Application Penetration Tester (eMAPT) [🔗](#)
- Cybersecurity Incident Response Analysis (STC) program
- eLearn Digital Forensics Professional (eCDFP) [🔗](#)
- eLearn Junior Penetration Tester (eJPT) [🔗](#)

PROJECTS

CRM Customer Portal Workflow – Marafiq

Worked on analyzing and improving CRM customer service workflows, including customer requests, support agent approval, SAP integration flow, appointment booking, and request tracking. Created UAT findings, workflow diagrams, and improvement suggestions for a better customer experience.

Marafiq Water Assistant Chatbot

Developed a proof-of-concept chatbot interface for water services to help users ask questions, access service information, and interact with a modern assistant UI. Focused on improving customer experience through a clean interface, quick responses, and service-oriented conversation flow.

Demo [🔗](#)

Smart Address Mapping System – Jubail Industrial City

Built a smart address mapping prototype for Jubail Industrial City to link housing/unit codes with map coordinates and address information. The system allows selecting RC codes, capturing building locations on the map, and displaying address details such as district, street, city, and short address.

Brain Disease Detection

Developed a desktop application using Python integrated with our deep learning (CNNs) model to classify Alzheimer’s disease and brain tumors from MRI scans with 99.5% accuracy.

- Achievements: Awarded 1st place at Expo 2025 among JIC graduation projects

SKILLS

Technical Skills:

- Programming Languages: Python, C#, Java
- Frameworks: Next.js, ASP.NET, Frappe
- Web Development: HTML, CSS, JavaScript

Interpersonal Skills:

- Leadership and team collaboration
- Problem-solving and critical thinking
- Effective communication

PUBLICATIONS

An Interpretable CNN Framework for Multi-Class Brain Tumor Classification with Visual Explanation in MRI Scans
